Our ASIS.DW floor displays are the next expansion of our DW display line. Perfect for any floor space, our ASIS.DW displays provide a smart, clean look while allowing you to increase your frames. The DW.31.90/105 panels are nestled within the metal frames which hold them securely. They are available in all four of our acrylic finishes and all of our accessories can be used with the floor displays, as well. The brushed aluminum frame works well with the metal pins in the panel and matches all of the other metal frames on our site – from our dispensing tables to our hanging displays to our other ASIS-style displays. Optional Wheels are available at an extra charge.
