

LED Light Box

Assembly Instruction

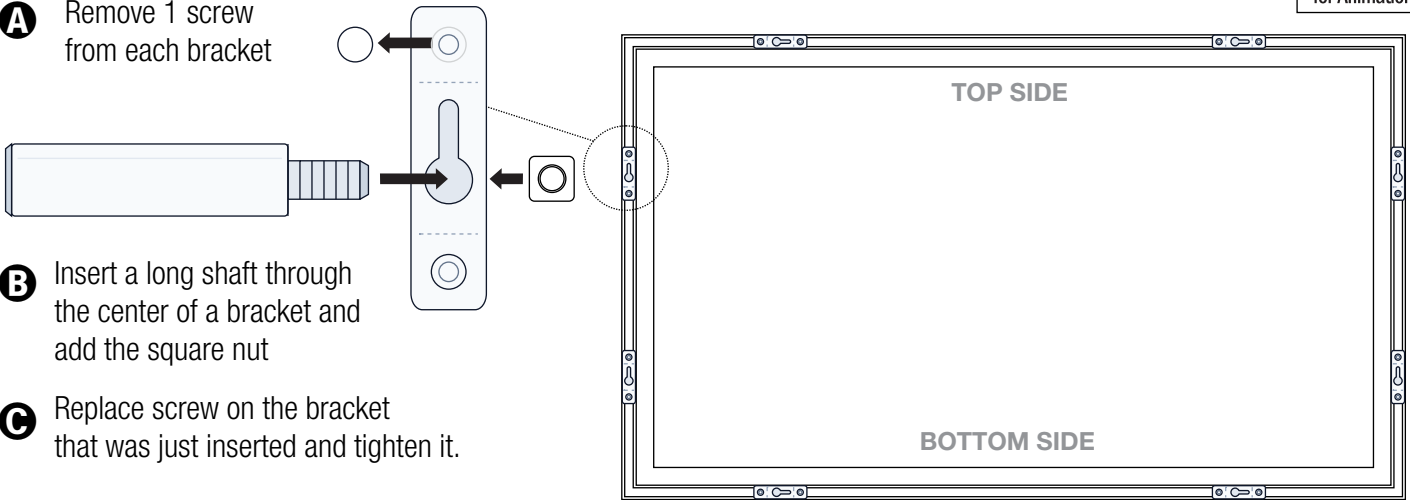

Scan QR Code
for Animation Video

- 1** Remove the screw from each bracket. Insert a long shaft through the center of a washer, then through the small hole in the back of the light box frame (from the front side).

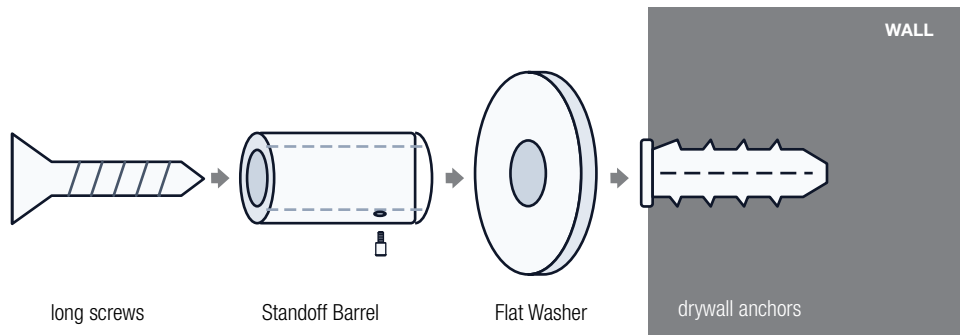

- A** Remove 1 screw from each bracket

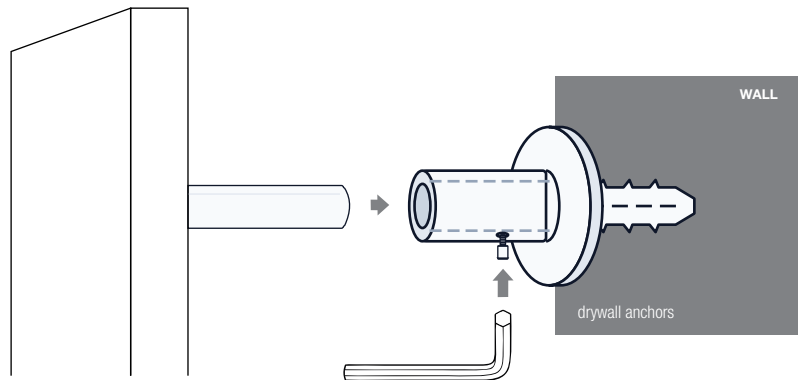

- B** Insert a long shaft through the center of a bracket and add the square nut

- C** Replace screw on the bracket that was just inserted and tighten it.

- 2** Use the drywall anchors and the long screws (inserted from the front of the barrel) to secure the light box to the wall. Use the standoffs to create space between the wall and the frame. Use the small Allen wrench to tighten the standoffs to the frame.

- 3** Use the small screws and the long standoffs to mount the frame to the surface.

- 4** Once the frame is mounted, flip the frame over so the front is facing up.

- 5** Slide the protective plastic sheet, the graphic/poster you want to display, and the clear acrylic cover into the frame.

- 6** Secure the front cover of the frame by snapping the edges down.
